

TRT Remeex[®] female system

How do you treat Recurrent Stress Urinary Incontinence?

- **The first and only readjustable sling which allows future fine-tuning of urethral support for women suffering from recurrent stress urinary incontinence.**

- **Proven efficacy with 5 year clinical follow up data.**

(PubMed Neurourol Urodyn. 2010 Feb 1; 20127837— Dr. Errando et al)

- **Complete tension free retropubic placement which eliminates the guesswork of accurate sling positioning.**

- **Provides Surgeon with flexibility to increase/decrease urethral support with their patient awake, standing & actively participating in achieving continence.**

TRT Remeex[®] female system

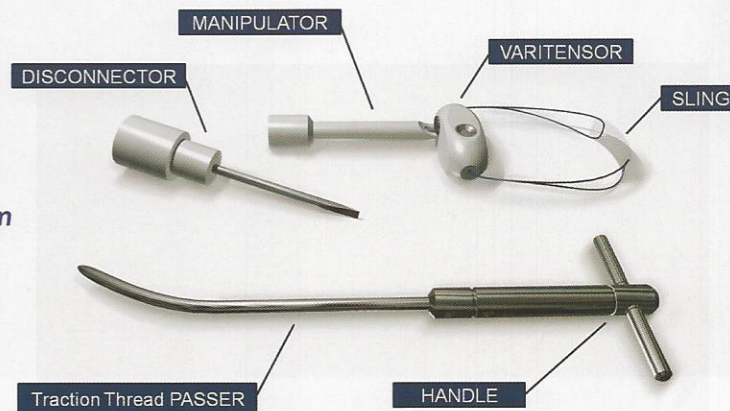

"Maximum effectiveness with minimal risk of postoperative obstruction which is possible due to adjustment of sling tension in the narrow therapeutic interval between recurrent incontinence and de novo obstruction. This is most important in recurrent cases"

by **Eugene Kaplan MD**, Center for Advanced Gynecologic Surgery, Walnut Creek (CA), USA

Flexibility to readjust....

- TRT Remeex allows for readjustment of urethral support whenever needed with a very simple procedure.
- Adjust the sling months or even years post-op to treat recurrence of symptoms.
